

Assignment 4

1. Create an array of integers and use a for loop to print out each element of the array.

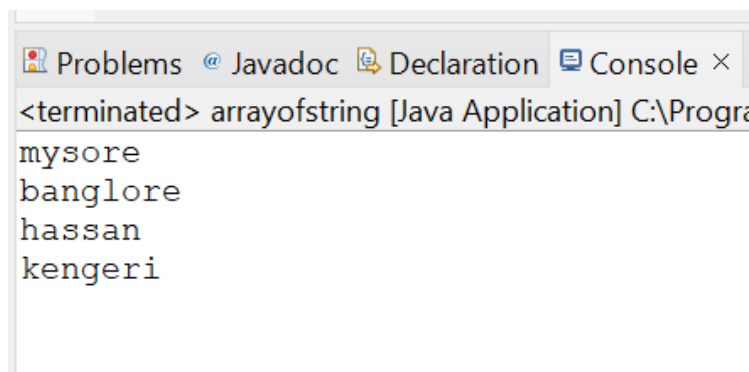

<https://codeshare.io/ZJEvAd>

```
Problems @ Javadoc Declaration Console ×
<terminated> arrayofinteger [Java Application] C:\Pro
Elements of given array:
1 2 3 4 5
```

2. Create an array of strings and use a for-each loop to print out each element of the array.

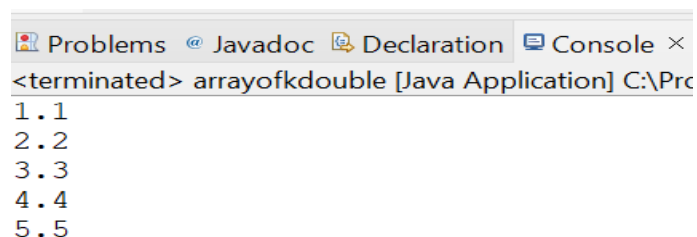

<https://codeshare.io/X8EwAj>

```
Problems @ Javadoc Declaration Console ×
<terminated> arrayofstring [Java Application] C:\Progra
mysore
banglore
hassan
kengeri
```

3. Create an array of doubles and use a while loop to print out each element of the array

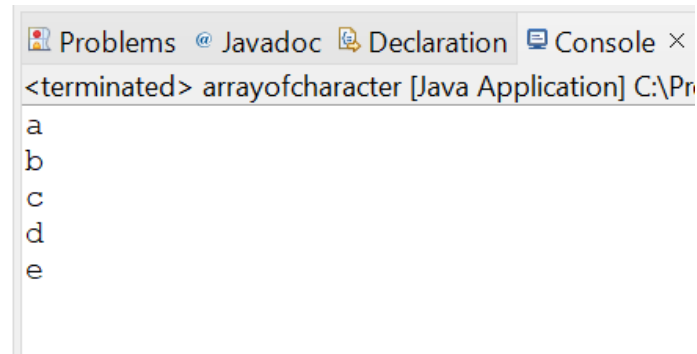

<https://codeshare.io/nzoMzY>

```
Problems @ Javadoc Declaration Console ×
<terminated> arrayofkdouble [Java Application] C:\Pro
1.1
2.2
3.3
4.4
5.5
```

4. Create an array of characters and use a do-while loop to print out each element of the array

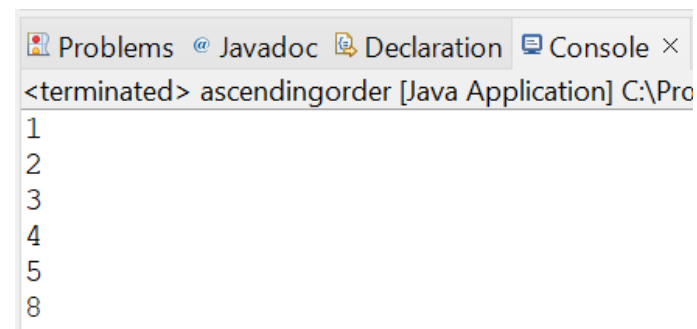

<https://codeshare.io/1Y89Yj>

```
Problems @ Javadoc Declaration Console ×
<terminated> arrayofcharacter [Java Application] C:\Pr
a
b
c
d
e
```

5. Create an array of integers and use the Arrays class method sort() to sort the array in ascending order

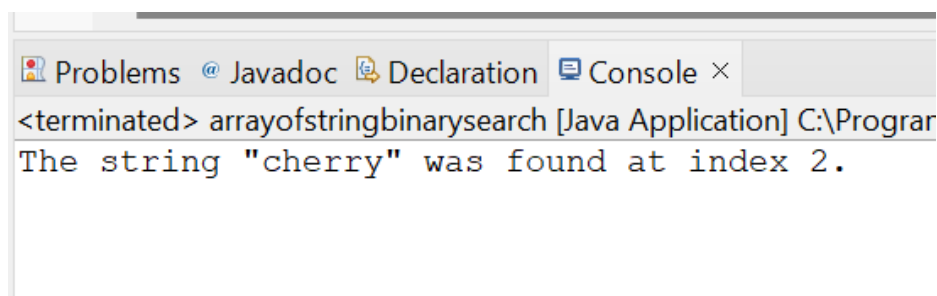

<https://codeshare.io/1Y89Yj>

```
Problems @ Javadoc Declaration Console ×
<terminated> ascendingorder [Java Application] C:\Pr
1
2
3
4
5
8
```

6. Create an array of strings and use the Arrays class method binarySearch() to find the index of a specific string in the array

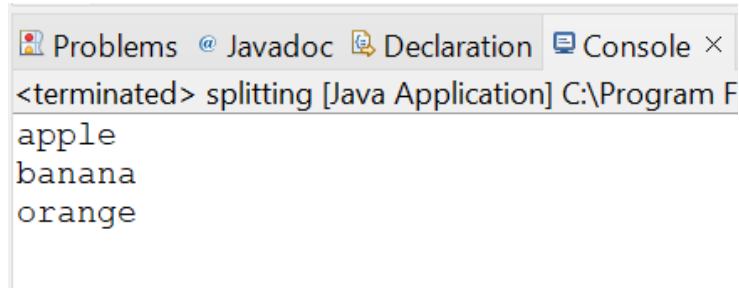

<https://codeshare.io/dwQleD>

```
Problems @ Javadoc Declaration Console ×
<terminated> arrayofstringbinarysearch [Java Application] C:\Progar
The string "cherry" was found at index 2.
```

7. Create a string and use the String class method `split()` to split the string into an array of substrings

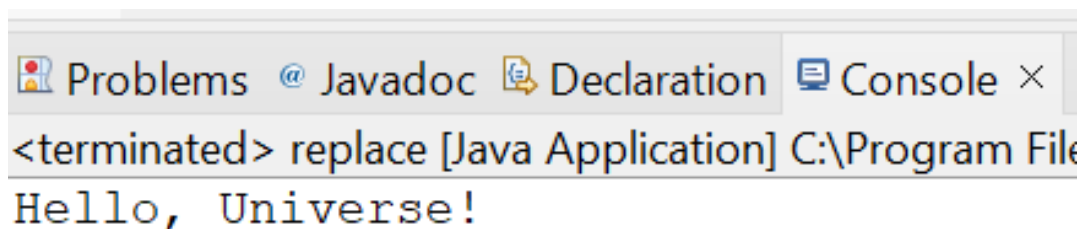

<https://codeshare.io/r9IE4V>

```
Problems @ Javadoc Declaration Console ×
<terminated> splitting [Java Application] C:\Program F
apple
banana
orange
```

8. Create a string and use the String class method `replace()` to replace a specific substring in the string with a new substring

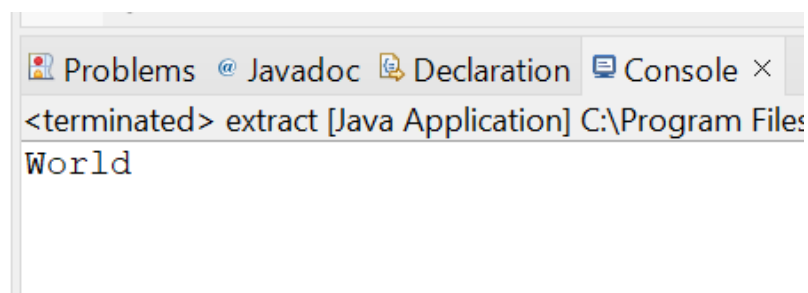

<https://codeshare.io/gL9E8B>

```
Problems @ Javadoc Declaration Console ×
<terminated> replace [Java Application] C:\Program File
Hello, Universe!
```

9. Create a string and use the String class method `substring()` to extract a portion of the string

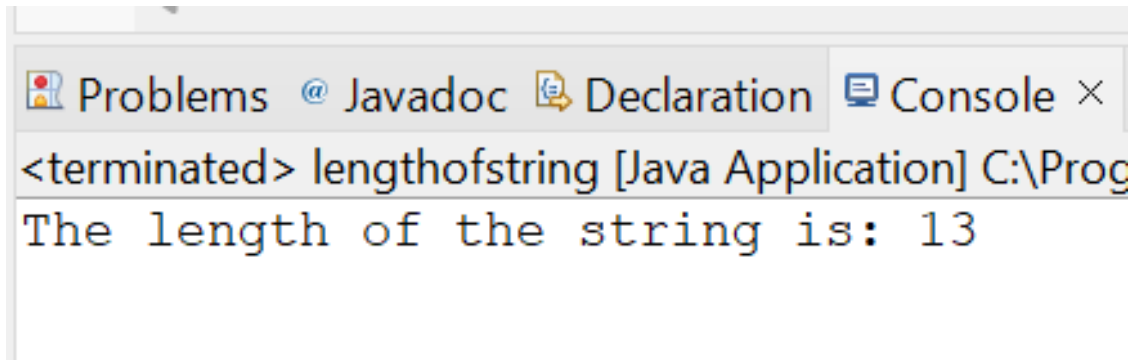

<https://codeshare.io/xv4ELD>

```
Problems @ Javadoc Declaration Console ×
<terminated> extract [Java Application] C:\Program Files
World
```

10. Create a string and use the String class method `length()` to find the length of the string

<https://codeshare.io/wnvEyp>

The screenshot shows a console window from an IDE. The title bar includes tabs for 'Problems', 'Javadoc', 'Declaration', and 'Console'. The console output displays the text: `<terminated> lengthofstring [Java Application] C:\Prog` followed by a new line and the text: `The length of the string is: 13`.
